Finding Your Modem's Satellite IP Address

TracNet™ H30, H60, H90, TracPhone® V30

1. Using a web browser on any device connected to the BDU's network*, enter **https://kvhonboard.com**, or enter the BDU's IP address *(default is either https://192.168.5.1 or 192.168.6.1)*.

2. At the web interface, go to the Support page. The modem's satellite IP address ("Management IP") is the first item listed under General Statistics.

General Statistics	
MANAGEMENT IP	10.108.138.2
LATITUDE	41.5215°N
LONGITUDE	71.2920°W

* BDU = Hub+, Hub, or VSAT-Hub Below Deck Unit.

TracPhone V3-HTS, V7-HTS, V11-HTS

1. Using a web browser on any device connected to the ICM's network, enter **http://minivsat.kvh**, or enter the ICM's IP address *(default is either 192.168.5.1 or 192.168.6.1)*.

2. At the web interface, go to the Support page. The modem's satellite IP address ("Management IP") is the first item listed under General Statistics.

General Statistics	
Management IP	10.64.8.2
KVH Support IP	10.224.11.236
Latitude	41.5214N
Longitude	71.2917W
