

# Integrated CommBox™ Modem – all-in-one system control and network management

The powerful Integrated CommBox Modem (ICM) is the streamlined all-in-one belowdecks unit at the heart of every TracPhone® HTS system.

Replacing a full rack of components required for competitors' systems, the 2U-high ICM contains:

- IP-enabled antenna control unit
- CommBox Network Manager
- iDirect Velocity® modem
- Voice over IP (VoIP) adapter
- Built-in Wi-Fi and Ethernet switch

It also delivers powerful CommBox network management software options and serves as the onboard gateway to receive, cache, and distribute the exciting content for operations and crew morale delivered by KVH's IP-MobileCast content delivery service. In addition, over-the-air software updates provide new features and upgrades to continuously improve the quality of your service. For ease of use, it features a browser-based user interface and a convenient iPhone® app for system status, updates, and support.

## QuickCrew

KVH CommBox QuickCrew offers powerful crew connectivity options, including roaming email that equips each crew member with a personal email account for use on any vessel in the fleet, as well as on shore. QuickCrew also includes a pre-paid solution for both email and web browsing. Access to the Internet is limited to the credit registered to the crew member's account. When the credit reaches \$0.00, access to that crew member's email and web browsing are disabled until the account is reloaded. It has never been easier to enable crew to keep in touch with their world while strengthening morale!

# CommBox Network Services

KVH's CommBox Network Services are an integral element of the ICM, the heart of every TracPhone VSAT system. The CommBox Network Services suite of management tools help you get more out of your communications solution via data routing and management, web optimization, efficient file transfers, optimized email, and flexible crew accounts.

Choose either the Standard or Enterprise bundle and work with our Application Engineering experts to develop a custom configuration perfect for your networking needs.

	STANDARD BUNDLE <sup>1</sup>	ENTERPRISE BUNDLE <sup>1</sup>
Description	The Standard Bundle is a streamlined, low-cost solution <sup>2</sup>	The Enterprise Bundle is a robust solution for your entire fleet <sup>2,3</sup>
Rate plan cost per month	\$95	\$195
QuickBasic Least cost routing, bandwidth management, onboard firewall	✓	✓
QuickFile Automated file transfers, differential synchronization		✓
