

KVH Managed Firewall Service

Powered by Fortinet®

Effective 17 January 2023

A value-added enhancement to KVH's Multi-level Cybersecurity Program

- Unified Threat Management (UTM): provides protection from multiple security threats in one integrated service
- Application/URL Control and Filtering: offers the option of controlling access at the individual application level; applied to each LAN for optimal flexibility in filtering
- VPN to Customer Data Center or Private Cloud provides a customized connection to your vessels
- All services remotely managed by KVH
- Compact below-decks hardware unit is suitable for any size vessel
- Single subscription includes both managed service and below-decks appliance

Enterprise-grade performance and protection

KVH Managed Firewall Service provides industry-leading Fortinet® cybersecurity to vessels requiring the highest level of protection against cyber-threats. Designed to complement the terminal-level security found in every TracNet™ hybrid terminal and TracPhone® VSAT-only antenna, the service provides an advanced array of cybersecurity services for a single, all-inclusive monthly subscription per vessel. Services include advanced firewall, basic routing, SD-WAN functionality, application-level controls, IPSEC/SSL VPN-capabilities, intrusion detection and prevention and web and application filtering. The compact, AC-powered below-decks unit is designed for easy installation and integration with KVH TracNet and TracPhone terminals.

Below-decks Unit Specifications

FortiGate Below-Decks Unit	
Height x Width x Length (inches)	1.5 x 8.5 x 6.3
