

TracNet™ Coastal

Stream. Talk. Watch. Connect.

Effective 3 December 2024

Get TracNet Coastal today!

1. The Speed and Affordability of 5G/LTE at Sea

- Data speeds as fast as 300+ Mbps plus high-gain Wi-Fi reception in marinas and ports*
- Data plans starting as low as \$1/GB†

2. Worldwide Cellular Coverage

- Connect in 135 countries via the KVH ONE® network and exclusive KVH Fusion eSIM technology along with the convenience of month-to-month data plans and the option to Bring Your Own SIM††

3. Stay Always Connected with Intelligent Hybrid Connectivity & SD-WAN

- Intelligent switching among 5G, LTE, and Wi-Fi with integrated onboard router
- Perfect hybrid complement for existing onboard communications, such as Starlink, VSAT, and OneWeb

4. Compact, Easy-to-install Integrated Design

- Marine-grade, compact antenna
- Single-cable antenna installation with ultra-efficient DC power design

* Data speed and range will vary based on 5G/LTE service availability, network provider agreements, antenna mounting location; onboard network equipment (including hardwired Ethernet connection or belowdeck Wi-Fi access point); position, height of, and distance to cell towers; network congestion; and network type. Service reception may also be affected by environmental or operational conditions, and its uninterrupted availability is not guaranteed.

† Data prices subject to change

†† Bring Your Own SIM requires the TracNet Coastal Pro

Faster, smaller, more intelligent communications at sea with 5G/LTE cellular service

Are you looking for faster, more affordable data to support your commercial operations connectivity? Imagine enjoying seamless and reliable connectivity for all your business needs while navigating coastal waters. Stream, talk, watch, and connect with KVH TracNet Coastal, a compact, fast, marine-grade system compatible with 5G and LTE cellular services worldwide!

Key features

- Integrated cellular/Wi-Fi system with intelligent hybrid switching
- High-gain 5G cellular antennas for extended offshore coverage
- Single-cable, DC-powered maritime design

Bring the speed, affordability, and power of 5G/LTE service and high-gain reception onboard, whether you are seeking:

- Standalone connectivity ideal for port and coastal waters
- An upgrade to your KVH TracPhone® HTS series or OpenNet program VSAT terminal, adding hybrid functionality to your system
- A hybrid upgrade for low earth orbit services like Starlink and OneWeb, utilizing integrated intelligent switching
- Access secure data usage reports, vessel positioning, user-selectable controls, and data alerts through the online and app-based KVH Manager at no additional cost

Two great options to meet your needs:

TracNet Coastal		TracNet Coastal Pro	
Designed as a highly affordable standalone, self-contained system or for integration to support hybrid functionality		Designed for standalone use and as an integrated, fully functional hybrid upgrade for third-party antennas
