

CommBox™ Edge Captive Portal with Paywall

Add Paywall to CommBox Edge to leverage onboard connectivity. Available as an add-on subscription for those with CommBox Edge Standard, Secure Suite, and Core Cloud Plus licenses, Paywall enables the creation of monetized data rate plans, limits, traffic policies, and WAN sources, all within the existing CommBox Edge Captive Portal.

Once Paywall is configured, administrators can add pre-pay plans to existing Captive Portal settings to manage multi-user internet access. Crew members can securely purchase data, and operators benefit from automated billing, detailed visibility, comprehensive tracking, thorough reporting, and precise control over crew connectivity and costs.

Start using Paywall today to optimize onboard connectivity management.

Features	Details
User Onboarding and Self-Service	<ul style="list-style-type: none"> Crew self registration with optional administrator approval. Crew self service usage tracking and on demand data purchases.
Flexible Plan and Payment Options	<ul style="list-style-type: none"> Create customized data plans and track detailed accounting for all crew transactions. Revenue tracking and financial reconciliation are streamlined through reporting and integration with Stripe. Pricing and currency options can be defined, with Stripe-supported payment methods including credit/debit card, Paypal, Apple / Android pay, and others.
Intelligent Traffic Prioritization and Shaping	<ul style="list-style-type: none"> Configure dynamic data controls, WAN usage policies, and quotas to efficiently manage communications and control bandwidth expenses. Manage channel usage and performance via WAN prioritization, bonding, load balancing, and traffic policy controls.
Cloud-management control and analytics	<ul style="list-style-type: none"> Remote management lets administrators deploy and control resources from any location, making it easy to control from the head office.
