

# CommBox™ Edge Communications Gateway

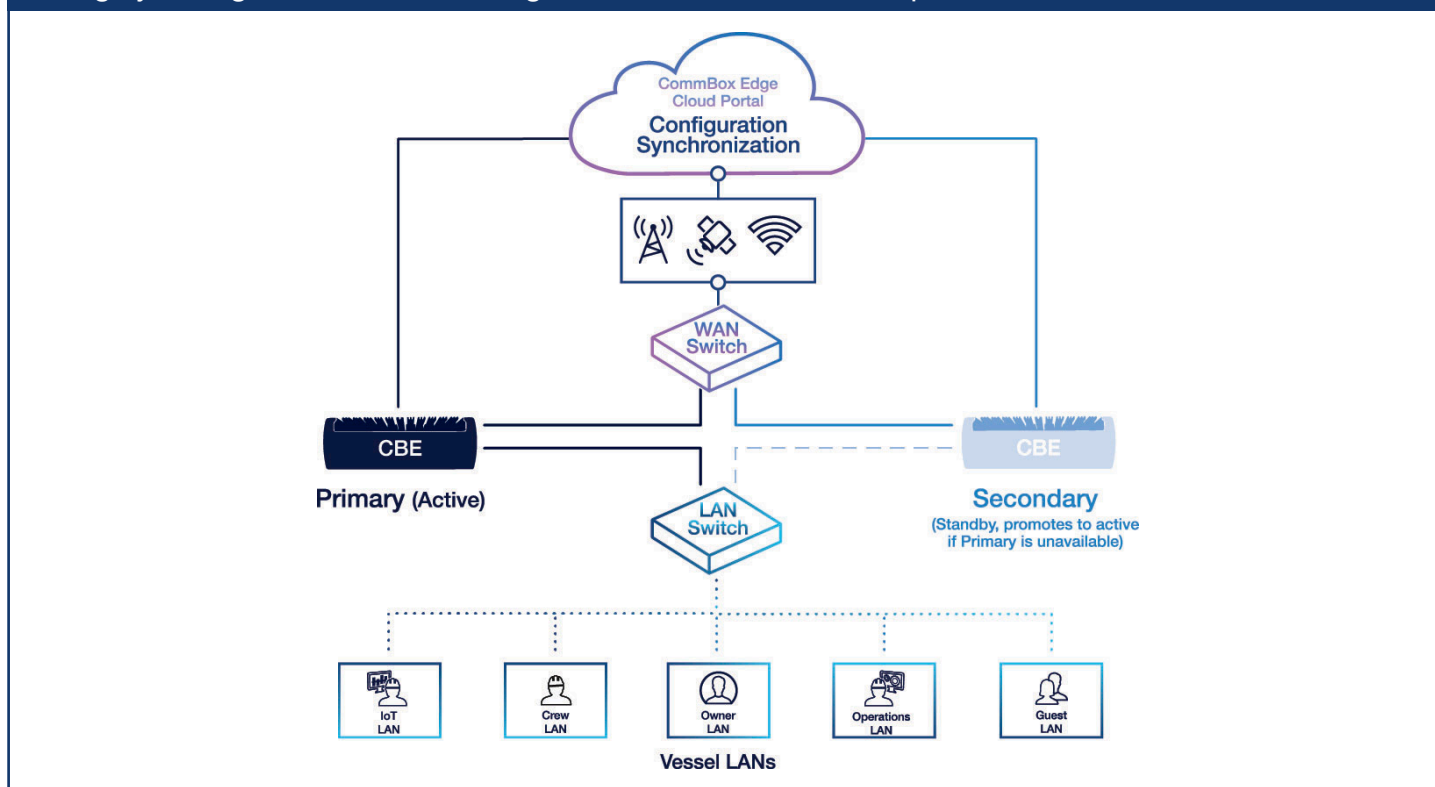

## Highlighting Network Performance Optimization

KVH's CommBox Edge offers a powerful on-vessel addition to your network infrastructure. Create an onboard network that meets your most demanding requirements with multiple easy-to-use and powerful channel management and bonding capabilities.

### Highly configurable network design with versatile interface options

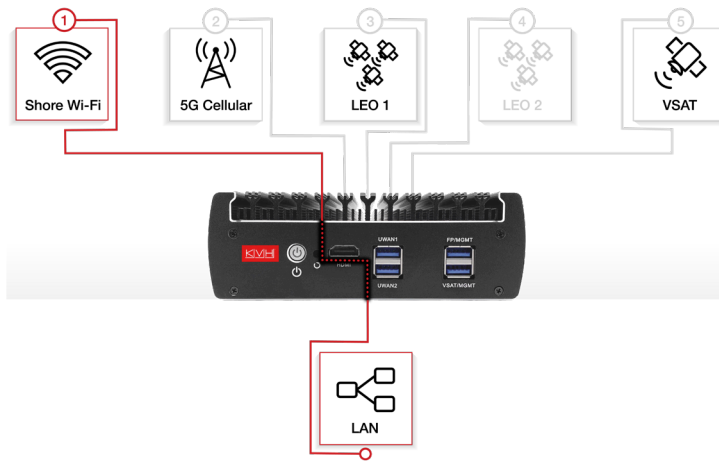

### Highly configurable network design with versatile interface options

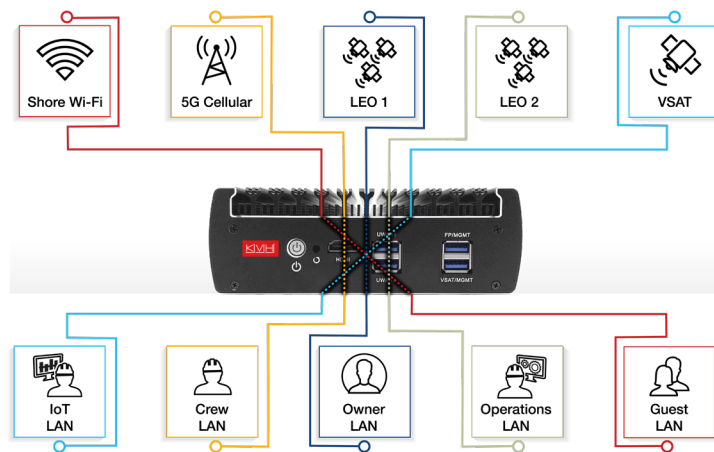

Visit [kvh.com/edge](http://kvh.com/edge) or contact [sales@kvh.com](mailto:sales@kvh.com) for more details.

Manage all Wide Area Networks (WANs) based on simple rules for progression based on availability, cost, etc.

Establish rules to govern which WANs support which Local Area Networks (LANs), devices, and users based on data consumption, availability, etc.

Boost speed and capacity through advanced bonding of WANs with similar latencies to maximize your connectivity
