

# LEO from KVH Value-added Service: Voice over IP

## Bring the Ease and Convenience of Voice Calling On Board

Even with the power of the Internet, streaming content, and video calls, a simple phone call is often the best and fastest way to reach someone or let them reach you. That's why KVH offers an easy, affordable upgrade for your Starlink or OneWeb service – Voice over IP (VoIP) calling.

Enjoy the convenience of choosing one or two dedicated phone lines for calls to and from land and mobile lines. Plus, you can add up to five virtual numbers per phone line for inbound local calling, eliminating international rates when your connections at work and home contact you, regardless of where your travels take you.

## Why Not Wi-Fi Calling?

With the addition of VoIP calling from KVH, you enjoy two phone lines and eliminate the potential issues that come with Wi-Fi calling.

First, your phone has to support Wi-Fi calling. Second, your phone service plan has to provide Wi-Fi calling service. Finally, the various agreements between phone providers and government regulations for your phone service plan with your home country phone number must also be compatible to deliver Wi-Fi calling.

With Wi-Fi calling tied to cell phones, you are relying on the phone being charged, onboard, unlocked and working properly. Having a dedicated VoIP number assigned to the boat eliminates these factors and can be used regardless of crew or management changes.

## An Easy Installation

Adding VoIP to your LEO solution is as simple as connecting a **KVH MTA (PN 19-1191, MSRP \$399) to a belowdeck switch (KVH CommBox™ Edge recommended)** and analog phones, all of which KVH can provide and arrange to have installed for you.

Visit [kvh.com/leo](https://kvh.com/leo) or contact | [sales@kvh.com](mailto:sales@kvh.com) for more details.

## Affordable VOIP Calling

- KVH offers up to two voice lines per MTA (multimedia terminal adapter) via Starlink or OneWeb.
- Choose either KVH-assigned phone numbers or user-specified (area code) phone numbers.
- Virtual local phone numbers can be added (up to 5 numbers per line) where available, subject to in-country regulations.
- Both incoming and outgoing calls are charged at \$0.68/minute worldwide. In a few select countries, satellite phone services are blocked.
