

# Why Satellite TV at Sea Makes Sense

## The Streaming Reality – Did you know that...

1 hour of full HD (1080 dpi) streaming = 3 GB of data\*

3 people onboard enjoying just 1 hour of HD each per day =

**270 GB of data per month!**

1 hour of UHD (4K) streaming = 7 GB of data\*

3 people onboard enjoying just 1 hour of UHD each per day =

**630 GB of data per month!**

\* Popular Science, "How much data does streaming live TV use?"

S	M	T	W	T	F	S
	1	2	3	4	5	6
7	8	9	10	11	12	13
14	15	16	17	18	19	20
21	22	23	24	25	26	27
28	29	30	1	2	3	4

## And if you rely on a 50 GB monthly data plan for streaming plus your other digital activities...

You're out of data before the end of the first week! And that's with NO Internet use, no social media, no video chats, no gaming, and no remote work!

## The Top Four Benefits of Satellite TV

### 1 Save on Streaming Costs

Internet at sea is far more affordable than it was even a few years ago, but the economics still don't add up for exclusively streaming content compared to satellite TV.

### 2 One Subscription, Unlimited Viewing

A single monthly subscription means you and everyone onboard can watch all you want on the go.

### 3 Everyone Gets to Watch What they Want

TracVision® systems can support 100+ receivers so every TV can show something different.

### 4 Easy Access to Live Events and Local Content

Enjoy your favorite programs and sports at the dock and far offshore, at anchor or on the move.

Save your onboard data for your digital life, while you sit back and enjoy some great TV. Discover how to bring the best satellite TV onboard affordably today! Visit [www.kvh.com/tv](http://www.kvh.com/tv) for more information.
