

Sailor 4300 for Iridium Certus® Service

Optional Backup System for TracPhone® mini-VSAT Broadband_{SM} Systems

This system is only available as a back-up to a mini-VSAT Broadband antenna system.

Other great features:

- 2 simultaneous VoIP lines and 2-port analog terminal adapter (ATA)
- Optional KVH Global Static IP
- Convenient single-cable design

Next-generation Solution for Fast Pole-to-Pole Coverage

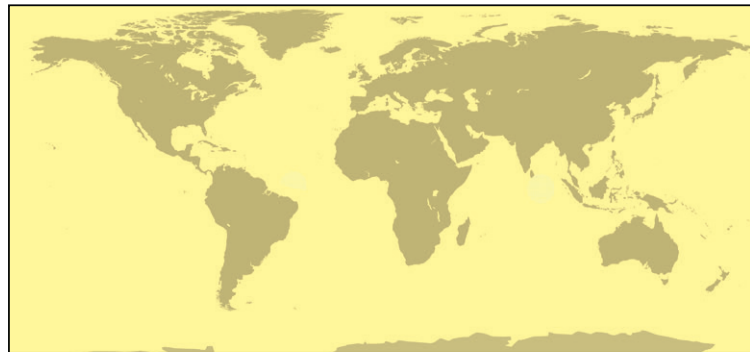

The Sailor 4300 for Iridium Certus Service is the perfect companion for KVH's award-winning TracPhone mini-VSAT Broadband Systems. This compact backup system, with Iridium's highest L-Band data speeds (704/176 Kbps down/up), provides uninterrupted connectivity, and pole-to-pole global coverage.

The system seamlessly integrates with all KVH TracPhone mini-VSAT Broadband antenna systems with optional least-cost routing that enables onboard data to switch from mini-VSAT Broadband service to Iridium Certus and back again as necessary.¹ Iridium voice connections via two voice lines are always available. You can also enjoy the confidence that comes with knowing that Iridium Certus enables out-of-band management for remote TracPhone VSAT antenna support anywhere on the globe to keep you connected anywhere you travel.

The Sailor 4300 is only available as a backup for active mini-VSAT Broadband systems. An airtime plan for Iridium Certus service must be selected (see sheet back) in addition to the vessel's airtime plan for mini-VSAT Broadband service.

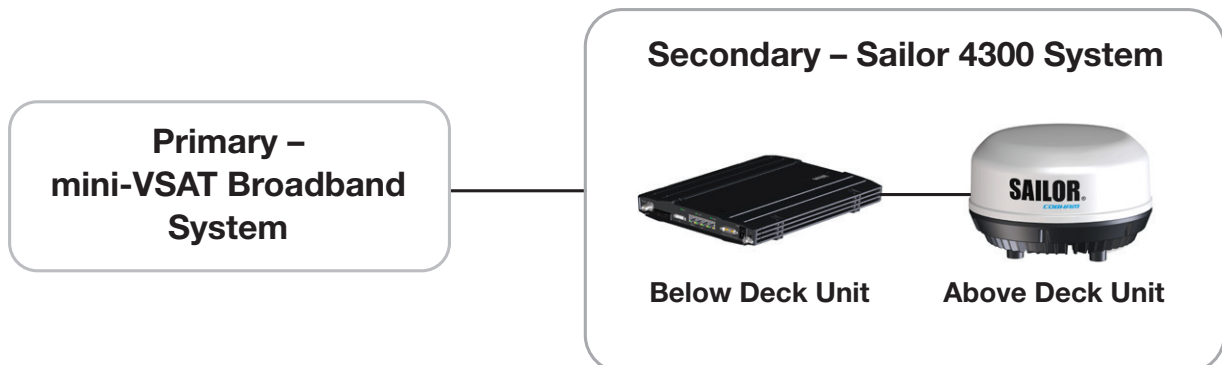

¹ KVH Commbox service required; contact KVH Application Engineering for details

Iridium Certus Pole-to-Pole L-band Coverage

Note: KVH provides no guarantees of satellite coverage or availability.

System Diagram:
